PREFACE

The Government used to compile and publish District Manuals for each district prior to 1905. The manuals became obsolete within a few years of their publication, containing as they did not only matter of a more or less permanent character such as physical characteristics, history, religion and ethnography, as also statistical matters which soon became out of date. The Government decided to replace the District Manuals by another publication known as the District Gazetteer, consisting of two volumes, A and B. The A volume contained descriptive matter and such general figures, as might be necessary to explain the text, and the B volume contained detailed statistics. They also decided that the B volume should be brought out periodically, especially after each decennial census. Between 1905 and 1927 A volumes for thirteen districts were published. In 1927 they were discontinued. B volumes for all the districts were published between 1906 and 1915. They were continued to be published even after the 1931 census. They were not published after the 1941 census.

Village Statistics, containing the results of the census for every village in the State, were first compiled and published in 1872, at the instance of Mr. C. E. Gover, who was then the Census Officer in Madras. His successor, in 1882, considered that this publication led to needless expenditure and trouble in printing the tables village-war, but the Government decided that the Village Statistics should continue to be published. The practice of issuing Village Statistics at every census was followed subsequently. The Village Statistics merely showed the number of occupied houses and population of each village and town by religions.

The idea of preparing the present volume, viz., the District Census Handbook for each district was put forward by Sri R. A. Gopalaswami, I.C.S., Registrar-General, India, and ex-officio Census Commissioner of India, as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the District level. He proposed that all the district census tables and census abstracts prepared during the process of sorting and compilation should be bound together in a single manuscript volume, called the District Census Handbook, and suggested to the State Governments that the handbook (with or without the addition of other useful information relating to the district) should be printed and published, at their own cost, in the same manner as the Village Statistics in the past. In accepting this suggestion, the Government of Madras decided to print and publish the more important portion of statistical data relating to the district and to preserve the rest of the records in a manuscript volume for any future use, to which they may be put.

2. The statistical data embodied in the District Census Handbook have to be understood from the background of the changes introduced in the 1951 census. The most important and fundamental change introduced in the 1951 census consists in the substitution of an economic classification of the people for the classification based on Religion and Communities

adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and the Non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

Agricultural Classes—

I. Cultivators of land, wholly or mainly owned, and their dependants.

II. Cultivators of land, wholly or mainly unowned, and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

Non-Agricultural Classes :—

Persons (including their dependants) who derive their principal means of livelihood from—

V. Production other than cultivation,

VI. Commerce,

VII. Transport, and

VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below :—

(i) Self-supporting persons,

(ii) Non-earning dependants, and

(iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, all earning dependants are economically semi-active. All self-supporting persons are ordinarily economically active, but the classes and groups specified below constitute an exception to this rule :—

(1) Self-supporting persons of Agricultural Class IV,

(2) Self-supporting persons of Livelihood Class VIII, who derive their principal means of livelihood from any source other than through economic activity, viz.—

(*a*) Non-working owners of non-agricultural property,

(*b*) Pensioners and remittance holders ;

(*c*) Persons living on charity and other persons with unproductive occupations ; and

(*d*) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to the eight livelihood classes and the three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified with reference to the nature of the commodity produced or service performed. They are further divided into three sections, viz., Employers, Employees and Independent Workers.

Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I, included in this Handbook covers the population of sample households and Tables C-II and C-IV cover a ten per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook.*—The Handbook has been divided into two parts; Part I consists of three sections, namely, Section (i) containing the General Population Tables (A series), the Economic Tables (B series), Summary figures for Taluks (Table E), Tables I, II and III relating to Small-scale Industrial Establishments and Table L showing the Incidence of Leprosy, Section (ii) containing the Rural Statistics, and Section (iii) containing the Urban Statistics, and Part II containing the Household (size) Table C-I and Tables showing Livelihood Classes and literacy by Age-groups (C-II and C-IV), the Social and Cultural Tables (D series) and an abstract of non-agricultural occupations in the district. Among the tables included in the Handbook, Table A-IV—Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of livelihood under each livelihood class and Table C-II—Livelihood classes by age groups furnish information at the district level. The other population tables in the A series, the summary figures for Taluks (Table E) and the infirmity Table L showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribution among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small-scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The urban statistics in Part I, Section (iii) furnish similar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward-wise data. All other tables included in the Handbook provide information for units called census tracts with totals for the district.

4. *Census Tracts.*—A distinctive feature of the census statistics is its rural urban break-up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were small in size with reference to their population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out of areas declared as cities and census towns in each district. Every city was treated as a separate tract. Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped together to form a non-city urban tract. All the rural tracts in the State have been assigned

numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each is furnished in the fly-leaf note to economic Table B-I relating to the district.

The district, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table have been introduced in the fly-leaf attached to each with a view to enable the reader to get a precise idea of the data furnished in the Table.

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries, such as, cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving village-wise and ward-wise information for Small-scale Industries have been incorporated in the rural and urban statistics. The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of under-enumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevent paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public.

INTRODUCTION TO TIRUNELVELI DISTRICT.

I. (*a*) (i) *Situation.*—Tirunelveli district lies between 8° and 9° 30′ of the northern latitude and 77° 10′ and 78 °25′ of the eastern longitude. It is the southern most district of the Madras State. Cape Comorin in the United State of Travancore and Cochin is five miles from the southernmost point of Tirunelveli district. The district is flanked by the Gulf of Mannar on the east and the south, by the United State of Travancore and Cochin on the west and the Ramanathapuram district on the north. The villages of Anjengo, Thangasseri and a portion of Panagudi village originally attached to this district were recently transferred to the United States of Travancore and Cochin. The district has eight taluks comprised in the three Revenue Divisions mentioned below :—

Name of Revenue Division.	Headquarters of the Revenue Division.	Taluk comprised in the Revenue Division.	Area of taluk. SQ. MILES.	Headquarters of the taluk.
Tirunelveli	Tirunelveli	Sankaranayinarkoil ..	635	Sankaranayinarkoil.

(ii) *Physical characteristics.*—The Western Ghats run from north to south all along the western boundary of the district up to Aravamboli, in the United State of Travancore and Cochin, about 10 miles north of the south-western corner of the district. They lie on the western portion of Sankaranayinarkoil and Tenkasi taluks, the western and southern portions of Ambasamudram taluk and the western portion of Nanguneri taluk. A gap in the mountains just to the west of Tenkasi called the Aryankavu Pass allows communications by road and rail into the United State of Travancore and Cochin. The height of the Ghats which usually ranges from 3,000 feet to 5,000 feet with peaks shooting up to 6,000 feet diminishes considerably at the Aryankavu Pass. The Ghats break up near Aravamboli in the United State of Travancore and Cochin about 10 miles from Cape Comorin on the borders of Nanguneri taluk. There is a range of detached low hills in Srivaikuntam taluk called the Vallanadu hills with the highest peak 1,082 feet above mean sea level. The country east of the ghats is a plain sloping towards the sea relieved here and there by small isolated hillocks locally known as 'Pothais' and the Vallanadu hills. A faintly perceptible ridge of uneven height runs east from Uthumalai in Tenkasi taluk up to Gangaikondan in Tirunelveli taluk forming the water shed between the river Tambraparni and its chief tributory, the Chittar. In the East Coast taluks of Tiruchendur, Srivaikuntam and Nanguneri there are hillocks of sand called Theris. Close to these Theris there are vast expanses of water called 'Tharuvais.' There are also backwaters near the sea coast in Tiruchendur taluk.

The district can broadly be divided into (1) the hilly regions on the west comprising the ghat area, (2) the river valleys, (3) the upland plains between each river valley, (4) the wide plains of black cotton soil in the north-eastern part of the district and (5) the coastal sandy area in the east and south.

(*b*) *Rivers.*—There are a number of rivers in Tirunelveli district and almost all of them rise in the Western Ghats. The chief river is the Tambraparni about 75 miles long having its source in the Agasthiyar Peria Podigai in the Western Ghats. It has numerous tributaries in the Ghats such as the Peyar, Pambar, Ullar, Kariyar and Servayar in Ambasamudram taluk. The river has been dammed in Ambasamudram taluk at Papanasam for regulating the supply of water for irrigation and for generation of electricity. At the foot of the hills in Ambasamudram taluk it is joined by the river Manimuthar. Further down, the river Gadana rising in the Sivasailam hills in Ambasamudram taluk and flowing north of the Tambraparni joins the

Tambraparni at Tirupudaimarudur in Ambasamudram taluk. The Gadana is fed by the Ramanadhi and the Jambunadhi flowing from the hills to the west of Kadayam in Ambasamudram taluk. The river Tambraparni flows through Ambasamudram, Tirunelveli, Srivaikuntam and Tiruchendur taluks and enters the sea at Punnakayal in Tiruchendur taluk. The river Chittar rising in the Courtallam hills is fed by the Karupanadhi, the "Five-falls" river and the Aludakanyar in Tenkasi taluk. It flows through Tenkasi and Tirunelveli taluks and joins the Tambraparni at Sivalaperi in Tirunelveli taluk. The length of the Chittar is 40 miles. River Korayar drains the southern part of Ambasamudram taluk and flows into the Kannadian channel taking off from the Tambraparni.

The rivers in Nanguneri taluk are the Pachiar, the Karumaniar, the Kilamanimuthar, the Nambiar and the Hanumanadhi. The Pachiar rises in the Vellimalai slopes of the Western Ghats, and flowing through Nanguneri taluk joins finally the Palayam channel in Tirunelveli taluk. The Nambiar rises in the Mahendragiri slopes of the Western Ghats and falls into the sea. Its tributaries are the Tamarayar, the Kombayar and the Kodamadiyar. The Hanumanadhi rises in the limits of the United Stateof Travancore and Cochin and flowing through the Nanguneri taluk reaches the sea some five miles east of the district boundary.

In Sankaranayinarkoil taluk, there are a few small rivers. They are the Vadamalayar, the Kotamalayar, Nikshepanadhi, Kakanadhi and the Palayar. They join the Vaippar flowing from Ramanathapuram district through Kovilpatti taluk. The Malattar and the Uppodai are drainage courses in Kovilpatti taluk.

(c) *Forests.*—The forests in the district occupy an area of 522·8 square miles out of which the private forests containing plantations occupy an area of 16·1 square miles, while the rest is reserved forest managed by the Government Forest Department. The reserved forests consist of scrub jungle in some places. In other places deciduous species, high grass, etah, semi-ever-green, and ever-green shola occur. The plantations in the forests in Nanguneri taluk consist of teak and coffee. The plantations in Ambasamudram taluk consist of cordamom, tea, cinchona, tapioca and fruit gardens. The private forests in Tenkasi taluk contain cordamom plantations and fruit gardens. The private forest in Sankaranayinarkoil taluk contains cordamom plantations. Trees in the reserve forests are felled for charcoal and firewood by rotation arranged by the Forest department.

A statement showing the area of forests in each of the taluks is given below :—

Most of the rainfall is had during the north-east monsoon. Ambasamudram, Nanguneri and Tenkasi taluks get some showers during the south-west monsoon also from over the Ghats. The weather is hottest during April and May. It cools down gradually from June. November to February are the cool months. From July to September Nanguneri, Ambasamudram and Tenkasi taluks get the cool breeze of the south-west monsoon through the passes in the Ghats. Courtallam situated 3½ miles from Tankasi gets the benefit of this season on account of its proximity to the Aryankavu Pass.

(*e*) *Soils.*—Along the foot of the Ghats there is a belt of 10 to 20 miles width of light loam and sandy soil and along the coast 3 to 15 miles width of sand These two widen and fill the whole country south of the Tambraparni. North of the Tambraparni there are wide areas of undulating sandy soils and north and north-east of this lie broad level plains of rich black cotton soils.

The northern half of the district consists of black loam and the southern half red loam or sand with a strip of black loam in the valley of the Tambraparni. The black soil is of high value compared to red. The black soil of the river valley overlies a stiff yellow clay or Mar. Red soils in the higher reaches are poor, but along the river streams and with irrigation facilities they are good. On the south-east coast between the Tambraparni valley and mouth of the Nambiar is a tract of land about 40 miles long known as th ePalmyra forest. The soil here is a deep loose red loam with surface sand with its depth varying from a few inches in well-protected areas to about 20 feet in other places. The talukwise percentage distribution of soils for the settled area is given below :—

Name of taluk.	Wet: Black loam.	Wet: Black sandy loam.	Wet: Red loam.	Wet: Red sandy loam.	Dry: Black loam.	Dry: Black sandy loam.	Dry: Red loam.	Dry: Red sandy loam.

Kovilpatti and portions of Sankaranayinarkoil and Srivaikuntam taluks come under the large belt of the black cotton plain of the north-eastern part of the district. In other areas red soil predominates.

(*f*) *Irrigation and drainage facilities and liability to famine.*—The cultivation season created by the north-east monsoon i.e., from October to January is called the Pishanam season, that created by the south-west monsoon (June to September) is called the Kar season.

The district is mainly irrigated by the rivers rising in the Western Ghats through channels taking off from them above anicuts thrown across them. Irrigation is done direct from the channels or from tanks which they feed. Chains of tanks receive supply one after the other or direct from the channels. There are numerous rainfed tanks in the upland areas. In Tiruchendur taluk wells in 'Taruvai' areas called 'Theri springs' in which the water level keeps up to the water level in the Taruvais, are used for irrigation. There are also wells in the uplands irrigating limited areas. A special feature in Tenkasi taluk is the extensive raising of cholam crop on the dry lands adjoining the Ghats during the south-west monsoon with the aid of summer rains and light showers escaping through the Aryankavu Pass. The chief source of irrigation in the district is the river Tambraparni commanding an area of 87,900 acres. There are 8 anicuts across the river Tambraparni besides 2 dams above Papanasam where water is stored and released by regulators for generation of electricity and for irrigation. The river irrigates large areas in Ambasamudram, Tirunelveli, Srivaikuntam and Tiruchendur taluks.

The Kodaimelaligiyan, the Nediunni and the Kannadian anicuts serve Ambasamudram taluk.

The Kodayan channel taking off from the Ariyanayagipuram anicut, the Palayam channel from the Palavur anicut and the Tirunelveli channel taking off from the Suthamalli anicut serve Tirunelveli taluk.

The Marudur Melakal and Keelakal (channels) taking off from the Marudur anicut and the south main and north main channels taking off from the Srivaikuntam anicut serve Srivaikuntam taluk.

The Marudur Melakal and Srivaikuntam south main channel irrigate Tiruchendur taluk.

Ambasamudram taluk is also served by the Manimuthar, the Gadana river and the Varahanadhi. A scheme to construct a dam across the Manimuthar, a tributary of the Tambraparni, is under investigation. The Chittar river, the most important of the tributaries of the Tambraparni, irrigates some considerable area in the Tenkasi taluk, and a smaller area in the Tirunelveli taluk.

Nanguneri taluk is served by the Pachaiar, the Nambiar, the Kilamanimuthar, the Hanumanadhi and the Karumaniar. The Pachaiar in its lower reaches also serves a part of Tirunelveli taluk. Karumaniar also serves a portion in Tiruchendur taluk.

Sankaranayinarkoil taluk is served by the rivers Vadamaliar, Kottamaliar, Nikshepanadhi, Kakanadhi and the Palayar.

The taluk-wise details of major and minor irrigation sources and the ayacuts served by them are given below :—

Name of taluk.	Number of minor irrigation sources.	Ayacut of minor irrigation sources. ACS.	Ayacut of majer irrigation sources. ACS.
Sankaranayinarkoil ..	139	7,754·08	714
Kovilpatti	85	2,881·40	3,179
Tenkasi	192	9,281·48	10,542
Tirunelveli	114	4,985·32	35,982
Srivaikuntam	121	3,599·35	29,780
Ambasamudram	309	10,087·74	28,906
Nanguneri	521	19,555·24	12,500
Tiruchendur	102	3,846·36	30,738
Total ..	1,583	61,99097	152,341

In the deltaic areas, the Tambraparni, with a perennial flow, assures regular supply for the areas served by it. The Chittar in Tenkasi taluk gives an assured supply in its upper reaches. The other rivers and streams mentioned also have a fair supply by reason of their having their sources in the Western Ghats. The upland areas of the district in all taluks depend only on the numerous rainfed tanks for irrigation of crops and these tanks in turn depend upon the rainfall in their catchment area. Whenever the rains are not adequate and are not timely the crops in the upland areas fail. But such failures do not occur on a large scale. The district can be said to be free from famine on the whole.

(*g*) *Area cultivated with food and commercial crops.*—The food crops grown in the district are paddy, cholam, cumbu, ragi, korra, varaghu and samai. The pulses are greengram, redgram, blackgram, Bengal-gram and horse-gram. The commercial crops are groundnut, gingelly, cotton, tobacco, chillies and sugarcane.

The largest extent of paddy cultivation is in Ambasamudram taluk. Cholam is cultivated widely in Tenkasi and Sankaranayinarkoil taluks, and cumbu in Kovilpatti, Sankaranayinarkoil and Srivaikuntam taluks. Black-gram is cultivated in a considerable area in Tenkasi taluk. Cotton is very widely cultivated in Kovilpatti taluk.

The particulars of area cultivated with food crops, pulses and commercial crops in the various

taluks in 1948–49 which was the most recent normal year for the district are given in *Annexure I*.

(*h*) *Communications*—(*a*) *Roads*.—There are 1,537 miles of roads in the district. Of this 9 miles are P.W.D. roads and 157 miles municipal roads. Their classification excluding P.W.D. and municipal roads and talukwise distribution are furnished below :—

The roads maintained by the Highways Department are in good condition. The other roads suffer long periods of disrepair. Except in Tirunelveli and Ambasamudram taluks, road communications to rural parts are inadequate.

(*b*) *Railways*.—The district is served by 188¾ miles of metre gauge line of the Southern Railway. The main line runs from Madurai to Tuticorin traversing Kovilpatti and Srivaikuntam taluks. A branch line taking off at Maniyachi on the main line proceeds via Tirunelveli up to Shencottah and beyond into the United States of Travancore and Cochin traversing Tirunelveli, Ambasamudram and Tenkasi taluks. There is a branch line from Tirunelveli Junction to Tiruchendur passing via Srivaikuntam and Tiruchendur taluks. A chord line branching off from Tenkasi connects with the main line at Virudhunagar Junction traversing Sankaranayinarkoil taluk of this district. The district headquarters, all the divisional headquarters and all the taluk headquarters, except Nanguneri, are served by railway. Nanguneri is however served by a passenger, parcel and goods out agency from Tirunelveli Junction. There are also parcels and goods out agencies for Tisayanvilai and Vadakkuvalliyur in Nanguneri taluk from Tirunelveli Junction and for Kulasekharapattinam and Udangudi in Tiruchendur taluk from Tiruchendur.

(*i*) *Post and Telegraphs*.—There is one departmental telegraph office in the district. The district is provided with two Head Post and Telegraph offices, 49 Sub-Post and Telegraph offices, 14 non-combined sub-post offices, and 427 branch post offices. A taluk wise distribution of the offices is given below :—

II. (*a*) (i) *Growth of population*.—The particulars of population of the district and taluks in the years 1941 and 1951 and the percentage of variation are given below :—

Name of taluk.	Population. 1941.	Population. 1951.	Percentage of variation.
(1)	(2)	(3)	(4)
Tirunelveli district	**2,237379**	**2,445,967**	**9·3**
Sankaranayinarkoil .. .	284,699	366,261	12·2
Kovilpatti	383,498	322,351	(–) 4·5
Tenkasi	282,744	294,402	14·0
Tirunelveli	257,637	294,402	14·3
Srivaikuntam	259,523	301,859	16.3
Ambasamudram	233,993	265.056	13·3
Nanguneri	281,262	302,819	7·7
Tiruchendur	254,023	274,084	7·9

The population has shown an increase of 9·3 per cent during the decade as against 9·7 during the previous decade. Ambasamudram, Tirunelveli and S ivaikuntam taluks cover the best part of the fertile Tambraparni delta. The increases of 13·3 per cent, 14·3 per cent and 16·3 per cent, respectively, in these taluks are therefore fully to be expected. The two poor dry taluks of Nanguneri and Tiruchendur have shown only the moderate increases of 7·7 per cent and 7·9 per cent, respectively. These taluks also have suffered, from the recent failure of the north-east monsoon for a number of years in succession, and there has been migration of the labouring classes to fertile portions in the Tambraparni delta for employment. These taluks contain vast barren blocks and sandy tracts unfit for cultivation.

Tenkasi taluk has good dry lands and a considerable extent of irrigated land close to the Courtallam hills. It is not surprising therefore that this taluk has had an increase of 14 per cent. Sankaranayinarkoil and Kovilpatti are also dry taluks, but while the former has shown an increase of 12·1 per cent, the latter has shown an actual decrease to the extent of 4·5 per cent. The decrease in Kovilpatti is due to the fact that it suffered badly from the adverse seasonal conditions referred to above during the latter part of the decade, and there has been considerable emigration of labourers to the Tambraparni delta in the district, as well as to Tanjore district and to tea and coffee estates in Madurai, Malabar and the Nilgiris districts. Sankaranayinarkoil taluk has fared far better because it has had a better rainfall than Kovilpatti, and has a larger extent of wet ands (42,609 acres against 8,492 acres in Kovilpatti) under tanks which do not ordinarily fail, thanks to the supply from the small rivers and streams flowing down from the Western Ghats.

(Extracted from the Census Report—Part I.)

(ii) *Vital Statistics.*—A statement showing births and deaths and deaths due to various causes for the decade 1941-50 is furnished at *Annexure II*.

The average birth rate of 34·3 per mille during the decade was higher than that for the State (31·7). The annual birth rates covered about the average except in 1942. The average death rate was 23·7 per mille as compared with 21·2 for the State. On account of the very severe epidemic of cholera causing 12,492 deaths, the death rate in 1943 increased to 32·9 per mille. The death rates thereafter declined till 1949 and showed an increase in 1950. The average death rate (0·8 per mille) from cholera was higher than that (0·6) for the State, and it was about normal in the case of dysentery and diarrhoea, and respiratory diseases. The mortality rates from fevers and small-pox were below the normal for the State. The district was free from plague during the decade. The average maternal mortality rate was 9·4 per 1,000 child births as against 8·1 for the State.

The infant mortality rates recorded reveal a decline during the latter half of the decade.

(*b*) *Medical Relief.*—There are 16 hospitals and 36 dispensaries in the district. Seven of them are Government hospitals with 293 beds, two municipal hospitals with 18 beds, three local fund hospitals with 30 beds and 4 mission hospitals. There are 2 Government, 23 local fund, 4 municipal and 6 rural dispensaries. The Government Hospital at Vannarpet in Palayamcottai with 60 beds is a women and children hospital. The Mission Hospital at Dhonavur is also now confined to the treatment of women and children. The Municipal Hospital at Palayamcottai with 6 beds is used only for maternity cases. There are X-Ray facilities in the Government hospitals at Palayamcottai and Tuticorin. At Tuticorin there is a lepresorium run by the Roman Catholic Mission with 43 beds. There is a women and child-welfare centre run by the Red Cross Organization at Palayamcottai. A taluk wise list of hospitals and dispensaries is given below :—

V. *Items of general importance.*—Tirunelveli is the seat of the Collector and the District Judge.

There are four municipalities in the district. They are Tirunelveli, Tuticorin, Palayamcottai and Melapalayam. There is a veterinary hospital at Tirunelveli. There is an Agricultural Rice Research Station at Ambasamudram and an Agricultural Cotton Research Station at Kovilpatti. There is a Borstal School for adolescent offenders at Palayamkottai.

Sea-fishing is carried on along the entire coast.

The Papanasam Hydro-Thermal Electric Scheme provides electricity for the southern districts supplementing the Mettur and Pykara Grid.

Tuticorin is a sea-port. Ships are anchored a few miles off the coast. There is a sea route to Ceylon from Tuticorin with a regular steamer service Articles of trade of the southern districts pass through this port.

Courtallam, 3½ miles from Tenkasi, is a health resort attracting a large number of visitors during the south-west monsoon from June to September. The bath in the waterfalls of the Chittar river at Courtallam is invigorating.

The Subramanya Swami temple at Tiruchendur and the temple at Sankaranayinarkoil are sacred to the Hindus. Pilgrims visit them in large numbers from all over South India.

The Tamil poet, Sri Subramanya Bharati, spent most of his life at Ettaiyapuram where a Bharati Mandapam has been raised in his memory.

A—GENERAL POPULATION TABLES.

A-I—Area, Houses and Population.

This table shows for the rural and urban areas of each taluk and for the district, the area, the number of inhabited villages and towns, occupied houses and the total population with distribution by sex.

2. The district area shown in column (2) of this table is that supplied by the Surveyor-General of India. Area figures furnished by the Central Survey Office, Madras, have been adopted for the taluks. The total area of the taluks as furnished by the Central Survey Office, Madras, shown within brackets in column (2) differs from the area of the district furnished by the Surveyor-General.

3. "Village" is the revenue administrative unit within defined boundaries. This table gives particulars in respect of all villages containing one or more groups of habitations. Villages with no habitations are not included in this table.

4. "Town" is a place of usually not less than 5,000 inhabitants, possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated. The following places not having the population minimum of 5,000 have been treated as towns for the reason that they possess definitely urban characteristics :—

(1) Nazareth.
(2) Pudur.
(3) Karivalamvandanallur.
(4) Kadayam.
(5) Vilathikulam.

5. "House." Every dwelling with a separate main entrance has been treated as a house for census purposes.

22. TIRUNELVELI DISTRICT.

A-II—Variation in Population during fifty years.

This table compares the popula ion, of the district and of each taluk in the distr t as ascertained at the Census of 1951 with the orresponding figures of the five previous Censuses. The figures ecorded at the previous Censuses have been adjusted for subsequent territorial changes, if any, in order to afford a correct basis of compa ison. The adjusted figures show the population of taluks and the district as constituted at present.

2. The main territorial change that occurred during the decade is the transfer of the enclaves of Anjengo, Thangasseri and a portion of Panagudi village to the United States of Travancore-Cochin.

The district total suffered on account of the transfer a reduction of 7,164 persons (3,426 males and 3,738 females).

22. TIRUNELVELI DISTRICT.

A-IV—Cities and towns classified by Population with variations since 1901.

This table shows the population with distribution of sex of cities and towns of the district at each of the last six enumerations.

2. The following towns have been treated as cities for the 1951 Census :—

(1) Tirunelveli.

(2) Palayamcottai.

(3) Tuticorin.

3. The cities and town have been arranged in this table according to their population in 1951 under the following six classes :—

Class.	Limits of population.
I	100,000 and over.
II	50,000 to 100,000.
III	20,000 to 50,000.
IV	10,000 to 20,000.
V	5,000 to 10,000.
VI	Under 5,000.

4. Where possible, the former population of places treated for the first time as towns in 1941 and at this Census, has been extracted from Village Statistics. Where this could not be done, the columns have been left blank.

5. The population of towns for previous Censuses are those then recorded. No adjustments have been made for intervening changes in area.

6. Municipality, panchayat and cantonment are indicated by the use of the letters (M), (P), (C), respectively within brackets.

7. Towns newly appearing at this Census have been printed in *italics*.

This table shows the analysis of the Urban population in towns by livelihood classes, instead of by communities as in the previous censuses.

2. Under the Indian Census Economic Classification Scheme, the people have been divided into two broad livelihood categories, viz., the Agricultural classes and the Non-agricultural classes. There are four Agricultural classes and four Non-agricultural classes as shown below:

(i) *Agricultural Classes.*

I. Cultivators of land wholly or mainly owned and their dependants.

II. Cultivators of land wholly or mainly unowned and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land: agricultural rent receivers and their dependants.

(ii) *Non-Agricultural Classes.*

22. TIRUNELVELI DISTRICT.

E--Summary figures

The data contained in this table have been given for each taluk in the district.

2. The areas shown in column (2) of the table for the district and the taluk "total" are the latest figures furnished by the Central Survey Office, Madras. The areas given for "urban" are those furnished by the District officers. The areas for "rural" have been obtained by deducting the figures for "urban" from those for district and taluk "total."

3. The district area furnished by the Surveyor-General, India, which has been shown in Table A-I, could not be adopted in this table as Talukwise figures have not been furnished by him. The district areas given by the Surveyor-General differ in varying degrees from those furuished by the Central Survey Office, Madras.

4. Previous census figures of population have been adjusted with reference to the transfer of enclaves. The rural and urban population figures have been taken as they were at the 1941 and 1931 censuses and as they are at the present census, regardless of the changes of rural areas into urban areas and *vice versa* from census to census, for the purpose of calculating percentage variation between 1931 and 1941 and between 1941 and 1951. For calculating density for 'rural' and 'urban' for 1941, the areas of the town newly formed at the present Census rounded to the nearest square mile have been deducted from the areas given for urban in column (2) for 1951 and added to the areas given for 'rural,' in respect of the district and also the taluks concerned.

3. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependant.

4. "The principal means of livelihood" is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons, it is the only means of livelihood.

5. A person has been regarded as "Self-supporting" if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living adopted by him (or her) at the time of the Census. The income secured may be in cash or kind. Anyone who is not a "Self-supporting" person in this sense has been regarded as a dependant. An "earning" dependant is a person who secures an income which is not sufficient to support him (or her). A person who does not secure any income either in cash or kind, is a "non-earning dependant."

6. The non-earning dependants include persons performing housework or other domestic or personal services for other members of the same family household, but do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly-leaf to Economic Table B-III :—

(1) Persons living principally on income from non-agricultural property ;

(2) Persons living principally on pensions, remittances, scholarships and funds ;

(3) Inmates of jails, asylums, alms houses and recipients of doles ;

(4) Beggars and vagrants ; and

(5) All other persons living principally on income derived from non-productive activity.

22. TIRUNELVELI DISTRICT.

B-II—Secondary means of Livelihood.

This table gives for the district the number of persons, in each of the eight livelihood classes mentioned in Economic Table B-I, who possess a secondary means of livelihood and cross classifies them (according to the nature of such means of livelihood) under the same eight livelihood classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning, or the largest part of their income if they have more than one source of income.

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this Table.

B-III—Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each Census tract in the district. The areas comprised in each census tract denoted by its number in column (1) have been specified in the fly-leaf to Table B-I. In this table the Self-supporting persons in the four Non-agricultural Classes given in Economic Table B-I are distributed in the various divisions and subdivisions of Industries and Services under the Indian Census Economic Classification Scheme, according to their secondary Economic Status, namely, Employer, Employee and Independent worker.

2. (An) Employer (is) a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. (An) Employee (is) a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. (An) Independent worker (is) a person who works on his own without being employed by anyone for a salary or wage and who does not also employ anyone else in order to earn his livelihood.

5. Under the New Indian Census Economic Classification Scheme all Employers and Independent workers have been classified with reference to the Commodity produced or services performed by them individually. As regards Employees, all persons engaged in Production, Commerce, or Transport (and not being Domestic servants) have been classified with reference to their own activity and without reference to that of their employer. Domestic servants have been classified in one subdivision without reference to the nature of their work. All other Employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) have been classified with reference to the commodity produced or services rendered by their Employers.

6. The Non-agricultural classes classified in Economic Table B-I, correspond to the divisions and subdivisions into which they are distributed in this table as follows :—

Livelihood Class.	Division and Subdivisions of the I.C.E.C. Scheme.
Class V—Production other than cultivation.	Division 0.—Primary Industries not elsewhere specified. Division 1.—Mining and Quarrying. Division 2.—Processing and Manufacture—Foodstuffs, Textiles, Leather and products thereof. Division 3.—Processing and Manufacture—Metals, Chemicals and Products thereof. Division 4.—Processing and Manufacture—Not elsewhere specified.
Class VI—Commerce.	Division 6.—Commerce.
Class VII—Transport.	Subdivisions 7·0 to 7·4 of Division 7.—Transport, Storage and Communications.
Class VIII—Other Services and Miscellaneous sources.	Division 5.—Construction and Utilities. Division 7.—Transport, Storage and Communications with the exception of subdivisions 7·0 to 7·4. Division 8.—Health, Education and Public Administration; and Division 9.—Services not elsewhere specified.

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, pensions and family remittances, proceeds of begging and other unproductive activities. These are not, however, included in this table as it is limited to Industries and Services. Hence there will be a difference to this extent between the total self-supporting persons of the Non-Agricultural classes in Economic Table B-1 and the total of this table. The reconciliation will be effected by adding the figures given in the next paragraph.

SMALL- SCALE INDUSTRIES.

I—Distribution of Small-scale Industries by Tracts.

This table gives for each census tract, the number of small-scale industrial establishments under categories, non-textile and textile, with details for perennial and seasonal establishments.

2. The table covers only those establishments, to which the Factories Act does not apply. It relates, therefore, to all associate activities, where articles are produced, repaired or otherwise treated for sale, use or for disposal. Small mines not covered by the Indian Mines Act have also been included. The table does not include plantation industries of any kind.

3. The areas covered by each census tract in the district denoted by its number in column (1) have been given in the fly-leaf to Economic Table B-I.

Tract No.	Total number of Establishments.			Number of Non-Textile Establishments.				Number of Textile Establishments.			
	Total.	Non-Textile.	Textile.	Perennial. (Nine months and over.)	Six months and over but less than nine months.	Three months and over but less than six months.	Less than three months.	Perennial. III—Employment in Non-Textile Establishments.

This table gives for each census tract the number of persons employed in non-textile establishments referred to in Table I. The establishments have been grouped with reference to the scheme of grouping adopted in the Indian Census Economic Classification Scheme.

2. As in Table II, 'Boys' and 'Girls' refer to persons below 15 years of age.

3. The areas covered by each census tract in the district have been given in the fly-leaf to Table B-I.

NOTE.—The symbols 'W.T.' and 'P.T.' adopted in this table stand for 'Whole Time' and 'Part Time.'

PART II.

C—HOUSEHOLD AND AGE (SAMPLE) TABLES.

C-I—Household (size).

This table has been prepared in respect of a population covering the members of sample households selected from the entries in the National Register of Citizens on the basis of one household for every one thousand households. The sample households selected include roughly every tenth household in every hundredth house-numbering block in the Rural areas and every fiftieth household in every twentieth house-numbering block or locality in Urban areas.

2. The Agricultural and the Non-agricultural classes refer to the four agricultural and the four non-agricultural classes given in Table A-V. The Backward Classes include the Scheduled Castes, the Scheduled Tribes and other classes not treated as non-backward by the State Government for the purpose of 1951 Census. Anglo-Indians are included among the non-backward classes.

3. Columns (2) to (5) of the table relate to all the households and house hold population in each tract while colnmns (6)to(17) relate to the sample households selected.

4. The figures have been given for each census tract denoted by its number in column (1). The areas covered by each census tract have been given in the fly-leaf to Table B-I.

C-II —Livelihood Classes

This table shows the livelihood distribution by age-groups for Rural, Urban and District totals in respect of a sample population based on a ten per cent sample taken out when the enumeration slips were initially sorted. The ten per cent sample was taken out as follows :—

Each enumeration pad which consisted generally of 100 enumeration slips was broken and the slips relating to displaced persons which had been noticed during the process of the preliminary scrutiny were removed from the pack of slips for being dealt with separately. The pack was then 'cut" as in a card-game. The lower portion was placed above the upper portion and the slips were dealt into two pigeon-holes one marked 'G' and the other marked 'S' as follows :—

The first five slips were placed in the pigeon-hole 'G,' then one slip was placed in the pigeon-hole 'S.' There-

after for every nine slips placed in the pigeon-hole "G," one slip was placed in the pigeon-hole "S" until the total number of slips left was less than 9 and these residuary slips were all put into hole "G." All the slips contained in the pigeon-hole marked "S" were taken out, counted and marked as 'Sample' slips.

2. No smoothing formula has been adopted in preparing the table as in previous Censuses and the figures have been tabulated as actually returned in suitable age-groups.

3. The figures under age 'O' represent infants below one year.

C-IV—Age and Literacy.

This is yet another table prepared in respect of the ten per cent samples of the general population. (Vide fly-leaf to Table C-II).

2. Age-groups 0 and 1 to 4 given in Table C-II have been combined into one age-group, and the age-group 5 to 14 has been split into two sub-groups 5 to 9 and 10 to 14. Persons of age-group 0 to 4 are treated as illiterate.

3. The figures are given for each census tract denoted by its number in column (1). The areas covered by each census tract in the district have been specified in the fly-leaf to Table B-I.

4. 'Literates' are those who are able to read and write any simple letter in any language.

5. Persons who are partly literate, i.e., persons who are able to read only, have been included among the illiterates. Details for such persons are given below :—

2. The circumstances leading to the substitution of revised figures are briefly as follows :—

(i) At the time of sorting the enumeration slips in 1951, the sorters were given a list of the 77 Scheduled Castes shown in Roman type in the list in paragraph (ii) below. No instructions were given to the sorters as to how the slips were to be treated in the case of persons who returned themselves by a generic Scheduled Caste name such as Harijan or Depressed Class or Adivasi or by a recognized synonym such as Pulacheruman, Eralan, Kudan, Rolan, Alen, Paramban (for Cheruman), with the result that sorters in Tabulation Offices classified the communities according to their own interpretation. Consequently, a number of Scheduled Caste members who had returned themselves by generic names or by synonymous names were left out of the Scheduled Castes count. This situation came to the notice of the Government of India, who decided after careful consideration that persons who had returned themselves by generic or synonymous Scheduled Caste names should be counted as Scheduled Castes and that the Census Tables already published should be revised, where necessary, to show the correct position. In order to arrive at the correct figures of Scheduled Castes population a fresh sorting of the 1951 Census slips was accordingly organized in Madras.

(ii) Before commencing the sorting, a list of synonymous names (i.e.), names synonymous with those of the communities, published in the 'Constitution (Scheduled Castes) Order, 1950' was prepared in consultation with the Collectors of districts and sent to the State Governments of Madras and Andhra for acceptance. The list as finally accepted by the State Governments was got approved by the Government of India. Castes printed in Roman characters in the list below have been declared to be Scheduled Castes in the composite Madras State (as it existed before the formation of the Andhra State) by the 'Constitution (Scheduled Castes) Order, 1950' issued by the President under Article 341 (1) of the Constitution of India. The names in *italics* represent the synonyms of the names printed above them in Roman characters. The approved generic names adopted are the three names, Harijan, Depressed Class and Adivasi shown under Generic names, in the list below :—
